Métro: line 4, *Porte d'Orléans*
then Tramway 3a, *Cité universitaire*

How to get to the venue?

Past the main campus entrance, go through the Maison internationale building, then across the Great lawn.

Workshop on Health and Labour Policy Evaluation (HLPE)

Paris, 1-3 February 2017

Organised by the Institute for Research
and Information in Health Economics (IRDES)

Faced with a challenging economic environment, many countries have adapted new labour, health and welfare public policies. Their effects on individuals' well-being and on social inequalities are still not well understood. Successful policy conception and implementation require detailed knowledge of the connections between labour markets and health. The aim of this 2017 workshop is to provide a forum for presentation, discussion and communication of new evidence and their implications for public policy, across a wide range of issues in the field of labour and health economics. The topics covered by the workshop include, but are not limited to: health at work, determinants of sickness absences, employer incentives to curb absences and disability, flexicurity and well-being, impact of health status and disability on employment trajectories, ageing and labour participation, retirement and health, disability insurance and labour market participation, workers' compensation, policy evaluation and cross-country comparisons regarding all the above-mentioned issues.

Scientific committee

Eve Caroli	Professor of Economics at University of Paris-Dauphine, PSL-University of Paris-Dauphine, LEDa-LEGOS, Paris School of Economics and IZA. France
Monica Galizzi	Professor of Economics at University of Massachusetts Lowell and Senior Associate at Center for Women & Work, University of Massachusetts Lowell. United States of America
Pierre Koning	Professor of Economics at VU University Amsterdam and Associate Professor at Leiden University, IZA and Tinbergen Institute. The Netherlands
